Graduate Profile and Rationale

The Diploma of Ministry provides students with the opportunity to undertake AQF Level 5 study in practical ministry-oriented disciplines. It is designed for those who have a less formal educational background than those undertaking the Bachelor of Theology or Bachelor of Ministry awards, or those who are seeking an award requiring less overall commitment than AQF Level 6 or 7 studies.

The Diploma of Ministry provides students with introductory study designed for Christians seeking a foundation for informed participation in the local church, para-church ministries, and in the wider community. It also provides some opportunity to gain knowledge and skills appropriate for practical Christian ministry but not necessarily of the breadth or depth required for professional ministry. The award requires completion of course units in Biblical Studies, Theology, and Christian Life and Ministry.

Course Outcomes

Knowledge

Graduates will have:

- Technical and theoretical knowledge and concepts with introductory knowledge in Biblical Studies, Theology, and Christian Life and Ministry;
- wider experience of practical ministry generally that will form the basis for further learning.

Skills

Graduates will have:

- Cognitive, communication, and technical skills in a ministry-related body of knowledge, so that they are able to:
- identify, analyse, synthesise, and act on ministry-oriented information from a range of foundational sources;
- express ideas and perspectives related to Christian faith;
- communicate ministry-related knowledge, skills and ideas to others.

Applications of Knowledge and Skills

Graduates will have the ability to:

- demonstrate an understanding of theological knowledge by applying it in Christian ministry;
- perform technical operations within Christian ministry that have some complexity, taking personal responsibility for them;
- organise, with initiative and judgment, the work of self and others and plan, coordinate and evaluate the work of teams (within broad but generally well-defined parameters).
